COURSE OUTCOMES

The goal of the course is to provide comprehensive, individually focused training to the students that prepare them for providing a quality physiotherapy care to the patients.

Upon completion of graduate program in physiotherapy, the student should:

1. Clinical Knowledge: Graduates will demonstrate a comprehensive understanding of anatomy, physiology, biomechanics, and pathophysiology relevant to physiotherapy practice.

2. Assessment Skills: Graduates will be proficient in conducting thorough patient assessments, including history taking, physical examinations, and relevant diagnostic tests, to formulate accurate clinical diagnoses.

3. Treatment Planning and Implementation: Graduates will develop effective treatment plans based on evidence-based practice principles, utilizing a variety of therapeutic interventions such as exercise therapy, manual therapy, electrotherapy, and patient education.

4. Patient Management: Graduates will demonstrate competency in managing patients across the lifespan and with diverse musculoskeletal, neurological, cardiopulmonary, and other health conditions, while considering individual patient needs and preferences.

5. Clinical Reasoning and Problem-Solving: Graduates will be able to critically analyze clinical data, interpret research literature, and apply sound clinical reasoning to make informed decisions regarding patient care.

6. Communication and Interprofessional Collaboration: Graduates will possess strong communication skills and the ability to effectively collaborate with other healthcare professionals, patients, and their families to optimize patient outcomes.

7. Professionalism and Ethics: Graduates will adhere to professional and ethical standards, demonstrating integrity, compassion, cultural competence, and a commitment to lifelong learning and professional development.

8. Health Promotion and Prevention: Graduates will be able to promote health and prevent injury and disease through education, advocacy, and the implementation of preventative strategies within communities and healthcare settings.

9. Research and Evidence-Based Practice: Graduates will understand the principles of research methodology and evidence-based practice, enabling them to critically evaluate research literature and integrate best available evidence into clinical practice.

10. Leadership and Advocacy: Graduates will demonstrate leadership skills and advocate for the profession of physiotherapy, as well as for the needs and rights of individual patients and populations within the healthcare system.
